

REFLECTION PRODUCTS, INC.

SAFETY AND SECURITY PRODUCTS

- 90, 200 and 360° actual viewing angles available.
- For indoor use.
- Hard-backed with mounting brackets... or Lens only (Mounted using the holes in the flange around the mirror.)
- Recommended mounting height: 8 to 10 feet.
- Comes fully assembled (no assembly).
- Mirror Grade Acrylic with extremely good reflective properties.

- Use in stores, intersecting hallways, reception areas, outside elevators, parking garages where blind walkways intersect traffic lanes, etc.
- Used when you need to see around corners or a wide view of an area. The dome mirrors will enable you to quickly see if there is a person or object (vehicle or forklift) in the area.
- Clearly see the areas behind you or around a corner, hidden entrance ways, or blind area around your business.

Dome Mirrors

HARDBACK DOME MIRROR

Lens Only Dome Mirror

Both the “Hardback” and “Lens only” mirrors are made from the same Mirror Grade Acrylic. The Hard-backed mirror has a backing sealed to the mirror with an extruded rubber molding and mounting brackets. The Lens only is mounted through the holes in the flange.
